April 21, 1992

MR RICHARD JEFFERSON  
PO 305  
MILFORD UT 84751

Dear Richard:

Re: Milford Distribution System  
Meters

We have sent out an order to the Milford irrigation well water users requiring the installation and maintenance of operational and accurate meters on the wells. We will be following up on that after the 15th of May. I hope this will help you in your record keeping on the system.

The river commissioner's annual report is an important source of historical information. It can be a great assistance in making hydrological studies and in documenting water use under a particular water right.

It is unfortunate the data which you recorded last year in 1991 has been lost. If there is any chance the data can be retrieved we would urge you to follow-up with the person who was going to prepare the report.

I would encourage you to use your best efforts in collecting the water use data this year and to use care in selecting the people to produce the report next year. It would also be prudent to retain the original data sheets for your own files and reference in the future. This will be important to you because we are implementing a policy throughout the state that river commissioners will not be re-appointed if the report for the previous year has not been completed and submitted to the State Engineer.

If you have any questions concerning the report and how it should be prepared, please contact me at 538-7380.

Sincerely,

Lee H. Sim, P. E.

Assistant State Engineer  
Adjudication/Distribution
